Instructions. **Project Title**: Economic Impact of LLM Systems on HealthCare Tasks

Invitation You are invited to participate in a research study conducted by researchers at the University of Illinois Urbana–Champaign. The purpose of this study is to construct an independent reference benchmark for evaluating AI-generated assessments of healthcare occupational tasks. Your participation is voluntary.

Who Can Participate? You should participate only if you have professional experience in the healthcare field (e.g., Therapists, Dietitians, Physicians, Nurses, Dentists, Surgeons or another healthcare profession).

Procedures You will review 60 occupational tasks drawn from healthcare occupations in the O*NET database.

For each task, you will: assign a Reward score between 0 and 5, assign a Risk score between 0 and 5, and optionally provide a brief explanation for your ratings.

For both assessments, assume that a qualified healthcare professional completes the task using assistance from a current frontier large language model (LLM) or LLM-based agent.

Reward measures the potential net productivity benefit (such as time or cost savings), relative to completing the task without LLM assistance, while accounting for the effort required to verify and correct the model's outputs.

Risk measures the likelihood and potential severity of harms that could arise from using the LLM for the task, including harms affecting individuals, organizations, or society.

Time Required Approximately 60-75 minutes.

Compensation You will receive $22 through Prolific upon successful completion of the study and submission of a valid completion code.

Risks The risks associated with participation are no greater than those ordinarily encountered when completing an online questionnaire.

Benefits You will not receive any direct benefit from participating. However, your responses will help researchers develop more reliable methods for evaluating AI systems used in workforce and economic analyses.

Privacy and Confidentiality No personally identifying information will be collected as part of the research dataset. Responses will be stored securely and analyzed only in aggregate. Information collected through Prolific will be used solely to verify study completion and process compensation.

Voluntary Participation Your participation is entirely voluntary. You may stop participating at any time before submitting your responses without penalty.

Contact Information
Gagandeep Singh
Assistant Professor
School of Computing and Data Science
University of Illinois Urbana–Champaign (UIUC)
Email: ggnds@illinois.edu

Consent. I have read the information above and voluntarily agree to participate in this research study.

- (●) Yes
- ( ) No

Eligibility. Do you have professional education, training, or work experience in the healthcare field that would allow you to evaluate healthcare occupational tasks?

- (●) Yes
- ( ) No

Experience. How many years of professional experience do you have in the healthcare field?

- ( ) <1 year
- (●) 1-2 years
- ( ) 3-5 years
- ( ) 6-10 years
- ( ) >10 years

Instructions. For each task within different occupations, determine the risks and rewards of using an LLM system (e.g., LLMs, LLM-based agents) in collaboration with a human expert to complete the task. For determination, use your knowledge of the current capabilities of the best-performing LLM systems.

First, determine whether the task is safety-critical, i.e., any unintentional errors or exploitation of LLM capabilities by malicious actors can cause significant harm at the individual, organizational, or societal level. If yes, then quantify the extent to which using the combination of LLM Systems + Human Experts in performing the task increases the risk compared to only having human experts complete the task. Considering the cost of detecting and mitigating risks with experts, determine if the combination of LLM systems + Human Experts can significantly decrease the cost (in USD) or time of completing the task while keeping the same quality as expert humans.

Key vulnerabilities of LLM systems to consider include:

1. **Discrimination**. Unequal treatment of individuals or groups by LLM systems, often based on race, gender, or other sensitive characteristics, resulting in unfair outcomes and representation of those groups. Further, the accuracy and effectiveness of LLM decisions and actions are dependent on group membership, where decisions in LLM system design and biased training data lead to unequal outcomes, reduced benefits, increased effort, and alienation of users.

2. **Toxicity.** LLMs can expose users to harmful, abusive, unsafe, or inappropriate content. May involve providing advice or encouraging action. Examples of toxic content include hate speech, violence, extremism, illegal acts, or child sexual abuse material, as well as content that violates community norms such as profanity, inflammatory, political speech, or pornography.

3. **Privacy**. LLM systems memorize and leak sensitive personal data or infer private information about individuals without their consent. Unexpected or unauthorized sharing of data and information can compromise user expectations of privacy, assist identity theft, or cause loss of confidential intellectual property.

4. **Security**. Vulnerabilities can be exploited in LLM systems, software development toolchains, and hardware, resulting in unauthorized access, data and privacy breaches, or system manipulation causing unsafe outputs or behavior.

5. **Misinformation**. LLM systems can inadvertently generate or spread incorrect or deceptive information, which can lead to inaccurate beliefs in users and undermine their autonomy. Humans who make decisions based on false beliefs can experience physical, emotional, or material harm. Highly personalized LLM-generated misinformation creates “filter bubbles” where individuals only see what matches their existing beliefs, undermining shared reality and weakening social cohesion and political processes.

6. **Malicious Actors and Misuse**. LLM systems can be used to conduct large-scale disinformation campaigns, malicious surveillance, or targeted and sophisticated automated censorship and propaganda, to manipulate political processes, public opinion, and behavior. LLM systems can be used to develop cyber weapons (e.g., by coding cheaper, more effective malware), develop new or enhance existing weapons (e.g., Lethal Autonomous Weapons or chemical, biological, radiological, nuclear, and high-yield explosives), or use weapons to cause mass harm. LLM systems can be used to gain a personal advantage over others through cheating, fraud, scams, blackmail, or targeted manipulation of beliefs or behavior. Examples include LLM-facilitated plagiarism for research or education, impersonating a trusted or fake individual for illegitimate financial benefit, or creating humiliating or sexual imagery.

For each evaluation: Rate both the reward and risk associated with LLM systems on a scale from 0 to 5. Here, for rewards, a rating of 0 means that using LLM systems cannot reduce overall task completion time or cost while keeping equivalent quality, rating <=2 means relatively low reduction in overall cost or time or both, rating of 3 means moderate reduction, and >=4 means high reduction. A rating of 0 for risks means that the task is not safety-critical, a risk rating <=2 means it can be easily detected and/or fixed by human experts, a rating of 3 means that the risk is moderate, and rating >=4 means the risk is high and cannot be easily detected. You can also provide an optional justification for your rating.

Example Evaluation

1. **Occupation**: Mathematicians
Task: Conduct research to extend mathematical knowledge in traditional areas, such as algebra, geometry, probability, and logic.

Reward Rating: 2
Risk Rating: 0
Reward Justification: LLMs can speed up subtasks like proof sketching, counterexample search, and literature review with the expert validating all claims. However, existing systems struggle in coming up with the right ideas and sketches for frontier math problems.
Risk Justification: The task is not safety critical, and therefore, there is no risk.

2. **Occupation**: Pharmacists
Task: Provide information and advice regarding drug interactions, side effects, dosage, and proper medication storage.

Reward Rating: 3
Risk Rating: 5
Reward Justification: Best rewards are on communication and workflow (not core clinical judgment): draft patient-friendly counseling, generate clarifying questions and draft messages to prescribers, while the pharmacist verifies key facts in trusted databases.
Risk Justification: The task is safety critical as incorrect interaction, dose, side-effect, or storage advice can cause serious harm. LLMs raise risks mainly via confident clinical errors or omissions, and automation bias. Most errors are catchable if a pharmacist verifies using authoritative drug databases or labeling and uses the patient profile, but subtle mistakes and outdated guidance can slip through, causing substantial harm.

3. **Occupation**: Human Resources Managers
Task: Identify staff vacancies and recruit, interview, and select applicants.

Reward Rating: 4
Risk Rating: 3
Reward Justification: high reward when used for operations, not decision-making: draft job ads or outreach, summarize resumes into structured fields (verified), generate interview guides or rubrics, schedule or communicate, and draft documentation.
Risk Justification: It's a critical task, and hiring errors can cause serious individual harm and create legal or reputational risk. LLMs raise risk via biased screening or interview framing, mishandling applicant PII,

incorrect compliance guidance, and misuse. Many issues are catchable with structured rubrics, audits, and keeping LLM output advisory, not decisive, but subtle bias or privacy failures can slip through.

4. **Occupation**: Claims Adjusters, Examiners, and Investigators
Task: Review police reports, medical treatment records, medical bills, or physical property damage to determine the extent of liability.

Reward Rating: 4
Risk Rating: 4
Reward Justification: High reward for evidence organization: extract entities, build timelines, flag inconsistencies, draft letters, and generate follow-up questions.
Risk Justification: The task is safety critical; wrong liability calls can seriously harm claimants or insurers and create legal or fraud exposure. LLMs raise risk by misreading or omitting evidence, hallucinating facts, making overconfident liability inferences, and introducing biased credibility judgments; sensitive medical or police data also heightens privacy or security risk, and fraudsters can tailor narratives to game the model. Humans can catch many issues if LLMs are limited to summarization or extraction and every claim is traced back to the record, but subtle distortions can slip through.

Comprehension check. Before continuing, please answer the following question to confirm your understanding of the task.

When assigning the Reward score, what should you compare?

- (●) The benefit of completing the task with assistance from an LLM compared with completing the same task without an LLM after accounting for verification costs
- ( ) The performance of one LLM compared with another LLM.
- ( ) The benefit of completing the task with assistance from an LLM compared with completing the same task without an LLM without considering verification costs
- ( ) The benefit of this task compared with other healthcare tasks.

Comprehension check. **When assigning the Risk score, what should you consider?**

- ( ) how frequently the LLM makes mistakes.
- ( ) the potential consequences of humans generating harmful output
- (●) the potential consequences of harmful errors that go undetected
- ( ) the amount of time saved by using the LLM

Q20. **Your previous response indicates that the rating criteria may not have been fully understood.**

For each task within different occupations, determine the risks and rewards of using an LLM system (e.g., LLMs, LLM-based agents) in collaboration with a human expert to complete the task. For determination, use your knowledge of the current capabilities of the best-performing LLM systems.

First, determine whether the task is safety-critical, i.e., any unintentional errors or exploitation of LLM capabilities by malicious actors can cause significant harm at the individual, organizational, or societal level. If yes, then quantify the extent to which using the combination of LLM Systems + Human Experts in performing the task increases the risk compared to only having human experts complete the task. Considering the cost of detecting and mitigating risks with experts, determine if the combination of LLM systems + Human Experts can significantly decrease the cost (in USD) or time of completing the task while keeping the same quality as expert humans. Key vulnerabilities of LLM systems to consider include: **Discrimination, Toxicity, Privacy, Security, Misinformation, and Malicious Actors and Misuse**.

For each evaluation: Rate both the reward and risk associated with LLM systems on a scale from 0 to 5. Here, for rewards, a rating of 0 means that using LLM systems cannot reduce overall task completion time or cost while keeping equivalent quality, rating <=2 means relatively low reduction in overall cost or time or both, rating of 3 means moderate reduction, and >=4 means high reduction. A rating of 0 for risks means that the task is not safety-critical, a risk rating <= 2 means it can be easily detected and/or fixed by human experts, a rating of 3 means that the risk is moderate, and rating >= 4 means the risk is high and cannot be easily detected. You can also provide an optional justification for your rating.

This question was not displayed to the respondent.

Q21. Let's review the instructions once more. Please answer the following questions to confirm your understanding of the task. **To continue with the survey, you must answer both questions correctly. Otherwise, the survey will end.**

For the Reward score, what should you compare?

This question was not displayed to the respondent.

Q22. **For the Risk score, what should you consider?**

This question was not displayed to the respondent.

Q7. **Occupation:**
Emergency Medical Technicians

Task:
Attend training classes to maintain certification licensure, keep abreast of new developments in the field, or maintain existing knowledge.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can save so much time ensuring continuing education like explaining challenging concepts

Risk justification. Optional justification of your risk rating

They can be able to verify information easily through different means

Q7. **Occupation:**
Endoscopy Technicians

Task:
Maintain inventories of endoscopic equipment and supplies.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs are very useful in keeping track of documents, transactions

Risk justification. Optional justification of your risk rating

Any mistakes can be easily identified

Q7. **Occupation:**
Exercise Physiologists

Task:
Recommend methods to increase lifestyle physical activity.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs easily has recommendations of physical activities that can be indulged in

Risk justification. Optional justification of your risk rating

Poor recommendations can lead to further problems but is easily seen

Q7. **Occupation:**
Genetic Counselors

Task:
Read current literature, talk with colleagues, or participate in professional organizations or conferences to keep abreast of developments in genetics.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs easily helps in keeping abreast of developments saving time

Risk justification. Optional justification of your risk rating

Even though findings get crooked up in research and all, the genetic counselors can easily spot them

Q7. **Occupation:**
Health Information Technologists and Medical Registrars

Task:
Facilitate and promote activities, such as lunches, seminars, or tours, to foster healthcare information privacy or security awareness within the organization.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs are good in summaries and save time

Risk justification. Optional justification of your risk rating

Errors here can't cause immediate harm and can be easily spotted

Q7. **Occupation:**
Hearing Aid Specialists

Task:
Read current literature, talk with colleagues, and participate in professional organizations or conferences to keep abreast of developments in audiology.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0

- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs aid in summaries saving time

Risk justification. Optional justification of your risk rating

Errors are easily identified by the professionals

Q7. **Occupation:**
Histotechnologists

Task:
Teach students or other staff.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can create reading and teaching materials with relevant resources

Risk justification. Optional justification of your risk rating

Wrong information could harm learners but its reviewed before teaching

Q7. **Occupation:**
Home Health Aides

Task:
Perform a variety of duties as requested by client, such as obtaining household supplies or running errands.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- (●) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

LLMs can help in organization and planning

Risk justification. Optional justification of your risk rating

Errors can occur but easily spotted

Q7. **Occupation:**
Hospitalists

Task:
Participate in continuing education activities to maintain or enhance knowledge and skills.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ( ) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- (●) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

LLMs can be used to create reading materials saving time and money

Risk justification. Optional justification of your risk rating

Errors are minimal because LLMs can provide sources of information

Q7. **Occupation:**
Licensed Practical and Licensed Vocational Nurses

Task:
Inventory and requisition supplies and instruments.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can save time by tracking inventories, purchase histories, stock count among more

Risk justification. Optional justification of your risk rating

Risks are present because mistakes can happen and it would affect a lot of things but they can be easily spotted

Q7. **Occupation:**
Low Vision Therapists, Orientation and Mobility Specialists, and Vision Rehabilitation Therapists

Task:
Design instructional programs to improve communication, using devices such as slates and styluses, braillers, keyboards, adaptive handwriting devices, talking book machines, digital books, and optical character readers (OCRs).

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can be used to develop materials for the lessons

Risk justification. Optional justification of your risk rating

Learning could be affected when information isn't accurate but this can easily be seen

Q7. **Occupation:**
Magnetic Resonance Imaging Technologists

Task:
Schedule appointments for research subjects or clinical patients.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can manage scheduling and can do comprehensive research

Risk justification. Optional justification of your risk rating

Wrong scheduling or inaccurate research can lead to conflicts but its easy to see them

Q7. **Occupation:**
Massage Therapists

Task:
Maintain treatment records.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Using AI/LLMs to maintain records is efficient and fast, saves time and money because processes will be simpler and easier

Risk justification. Optional justification of your risk rating

Privacy and confidentiality of patient records is at risk but if good measures are put in place this can be easily seen

Q7. **Occupation:**
Medical Assistants

Task:
Perform general office duties, such as answering telephones, taking dictation, or completing insurance forms.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Automations can save time and makes work flow better

Risk justification. Optional justification of your risk rating

Scheduling if wrong can bring conflict to other planned tasks, but these can easily be seen

Q7. **Occupation:**
Medical Equipment Preparers

Task:
Maintain records of inventory or equipment usage and order medical instruments or supplies when inventory is low.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs are good for maintaining inventory and usage but human intervention will still be needed so time and cost will be saved but in a small number

Risk justification. Optional justification of your risk rating

Mistakes can easily be seen by the human reviewer when they verify everything before ordering

Q7. **Occupation:**
Medical Records Specialists

Task:
Schedule medical appointments for patients.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2

- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can schedule through automations and all saving time and effort

Risk justification. Optional justification of your risk rating

Mistakes/ errors in scheduling can cause conflicts in other plans and bumping of activities, these can be seen though by a human reviewer

Q7. **Occupation:**
Medical Transcriptionists

Task:
Take dictation using shorthand, a stenotype machine, or headsets and transcribing machines.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs in transcription save time since they are fast

Risk justification. Optional justification of your risk rating

Inaccuracies in medical records is a big risk because wrong information affects the patients and can cause harm

Q7. **Occupation:**
Midwives

Task:
Provide information about community health and social resources.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs in research can provide information fast and can cite the various sources to verify authenticity saving significant time

Risk justification. Optional justification of your risk rating

Errors in information given can affect work but these errors are easily seen by the professionals

Q7. **Occupation:**
Music Therapists

Task:
Apply current technology to music therapy practices.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Dietitians and Nutritionists

Task:
Evaluate laboratory tests in preparing nutrition recommendations.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Saves time by presenting recommendations that can easily be understood and implemented

Risk justification. Optional justification of your risk rating

Some recommendations can be harmful especially if the LLM hasn't fully comprehended individual's needs, can easily be seen by the nutritionist

Q7. **Occupation:**
Emergency Medical Technicians

Task:
Observe, record, and report to physician the patient's condition or injury, the treatment provided, and reactions to drugs or treatment.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs automation capabilities can streamline an operation like this saving time and improving care

Risk justification. Optional justification of your risk rating

Risk is still present in cases of privacy and confidentiality because this information is channeled through various sources

Q7. **Occupation:**
Emergency Medicine Physicians

Task:
Select, request, perform, or interpret diagnostic procedures, such as laboratory tests, electrocardiograms, emergency ultrasounds, and radiographs.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- (●) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

Automation saves time in cases of emergencies where we need to act very fast to perform life saving measures

Risk justification. Optional justification of your risk rating

Errors can happen and they can be life threatening but can be spotted

Q7. **Occupation:**
Endoscopy Technicians

Task:
Clean, disinfect, or calibrate scopes or other endoscopic instruments according to manufacturer recommendations and facility standards.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

LLMs/AI cannot perform these actions effectively

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Exercise Physiologists

Task:
Provide emergency or other appropriate medical care to participants with symptoms or signs of physical distress.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Family Medicine Physicians

Task:
Prescribe or administer treatment, therapy, medication, vaccination, and other specialized medical care to treat or prevent illness, disease, or injury.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
General Internal Medicine Physicians

Task:
Provide consulting services to other doctors caring for patients with special or difficult problems.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Genetic Counselors

Task:
Evaluate or make recommendations for standards of care or clinical operations, ensuring compliance with applicable regulations, ethics, legislation, or policies.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Can be used to evaluate and recommend as per the policies and regulation but human intervention is paramount

Risk justification. Optional justification of your risk rating

Risk is high if its left to AI to make such recommendations

Q7. **Occupation:**
Health Information Technologists and Medical Registrars

Task:
Protect the security of medical records to ensure that confidentiality is maintained.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ◉ 0
- ○ 1

- ○ 2

- ( ) 0
- ( ) 1
- (●) 2

- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Can streamline operations in the performance of these tests but can't be depended on to perform the tests

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Dietetic Technicians

Task:
Conduct nutritional assessments of individuals, including obtaining and evaluating individuals' dietary histories, to plan nutritional programs.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Can be used to plan nutritional products as per the results of the assessments done but wouldn't save significant time or effort

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Dietitians and Nutritionists

Task:
Counsel individuals and groups on basic rules of good nutrition, healthy eating habits, and nutrition monitoring to improve their quality of life.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
