Instructions. **Project Title**: Economic Impact of LLM Systems on Legal Tasks

Invitation You are invited to participate in a research study conducted by researchers at the University of Illinois Urbana–Champaign. The purpose of this study is to construct an independent reference benchmark for evaluating AI-generated assessments of occupational tasks. Your participation is voluntary.

Who Can Participate? You should participate only if you have professional experience in the legal field (e.g., attorney, judge, law clerk, paralegal, legal assistant, mediator, arbitrator, or another legal profession).

Procedures You will review 60 occupational tasks drawn from legal occupations in the O*NET database.

For each task, you will: assign a Reward score between 0 and 5, assign a Risk score between 0 and 5, and optionally provide a brief explanation for your ratings.

For both assessments, assume that a qualified legal professional completes the task using assistance from a current frontier large language model (LLM) or LLM-based agent.

Reward measures the potential net productivity benefit (such as time or cost savings), relative to completing the task without LLM assistance, while accounting for the effort required to verify and correct the model's outputs.

Risk measures the likelihood and potential severity of harms that could arise from using the LLM for the task, including harms affecting individuals, organizations, or society.

Time Required Approximately 75-90 minutes.

Compensation You will receive $25 through Amazon Mechanical Turk upon successful completion of the study and submission of a valid completion code.

Risks The risks associated with participation are no greater than those ordinarily encountered when completing an online questionnaire.

Benefits You will not receive any direct benefit from participating. However, your responses will help researchers develop more reliable methods for evaluating AI systems used in workforce and economic analyses.

Privacy and Confidentiality No personally identifying information will be collected as part of the research dataset. Responses will be stored securely and analyzed only in aggregate. Information collected through Amazon Mechanical Turk will be used solely to verify study completion and process compensation.

Voluntary Participation Your participation is entirely voluntary. You may stop participating at any time before submitting your responses without penalty.

Contact Information
Gagandeep Singh
Assistant Professor
School of Computing and Data Science
University of Illinois Urbana–Champaign (UIUC)
Email: ggnds@illinois.edu

Consent. I have read the information above and voluntarily agree to participate in this research study.

- (●) Yes
- ( ) No

Eligibility. Do you have professional education, training, or work experience in the legal field that would allow you to evaluate legal occupational tasks?

- (●) Yes
- ( ) No

Experience. How many years of professional experience do you have in the legal field?

- ( ) <1 year
- (●) 1-2 years
- ( ) 3-5 years
- ( ) 6-10 years
- ( ) >10 years

Instructions. For each task within different occupations, determine the risks and rewards of using an LLM system (e.g., LLMs, LLM-based agents) in collaboration with a human expert to complete the task. For determination, use your knowledge of the current capabilities of the best-performing LLM systems.

First, determine whether the task is safety-critical, i.e., any unintentional errors or exploitation of LLM capabilities by malicious actors can cause significant harm at the individual, organizational, or societal level. If yes, then quantify the extent to which using the combination of LLM Systems + Human Experts in performing the task increases the risk compared to only having human experts complete the task. Considering the cost of detecting and mitigating risks with experts, determine if the combination of LLM systems + Human Experts can significantly decrease the cost (in USD) or time of completing the task while keeping the same quality as expert humans.

Key vulnerabilities of LLM systems to consider include:

1. **Discrimination**. Unequal treatment of individuals or groups by LLM systems, often based on race, gender, or other sensitive characteristics, resulting in unfair outcomes and representation of those groups. Further, the accuracy and effectiveness of LLM decisions and actions are dependent on group membership, where decisions in LLM system design and biased training data lead to unequal outcomes, reduced benefits, increased effort, and alienation of users.

2. **Toxicity.** LLMs can expose users to harmful, abusive, unsafe, or inappropriate content. May involve providing advice or encouraging action. Examples of toxic content include hate speech, violence, extremism, illegal acts, or child sexual abuse material, as well as content that violates community norms such as profanity, inflammatory, political speech, or pornography.

3. **Privacy**. LLM systems memorize and leak sensitive personal data or infer private information about individuals without their consent. Unexpected or unauthorized sharing of data and information can compromise user expectations of privacy, assist identity theft, or cause loss of confidential intellectual property.

4. **Security**. Vulnerabilities can be exploited in LLM systems, software development toolchains, and hardware, resulting in unauthorized access, data and privacy breaches, or system manipulation causing unsafe outputs or behavior.

5. **Misinformation**. LLM systems can inadvertently generate or spread incorrect or deceptive information, which can lead to inaccurate beliefs in users and undermine their autonomy. Humans who make decisions based on false beliefs can experience physical, emotional, or material harm. Highly personalized LLM-generated misinformation creates “filter bubbles” where individuals only see what matches their existing beliefs, undermining shared reality and weakening social cohesion and political processes.

6. **Malicious Actors and Misuse**. LLM systems can be used to conduct large-scale disinformation campaigns, malicious surveillance, or targeted and sophisticated automated censorship and propaganda, to manipulate political processes, public opinion, and behavior. LLM systems can be used to develop cyber weapons (e.g., by coding cheaper, more effective malware), develop new or enhance existing weapons (e.g., Lethal Autonomous Weapons or chemical, biological, radiological, nuclear, and high-yield explosives), or use weapons to cause mass harm. LLM systems can be used to gain a personal advantage over others through cheating, fraud, scams, blackmail, or targeted manipulation of beliefs or behavior. Examples include LLM-facilitated plagiarism for research or education, impersonating a trusted or fake individual for illegitimate financial benefit, or creating humiliating or sexual imagery.

For each evaluation: Rate both the reward and risk associated with LLM systems on a scale from 0 to 5. Here, for rewards, a rating of 0 means that using LLM systems cannot reduce overall task completion time or cost while keeping equivalent quality, rating <=2 means relatively low reduction in overall cost or time or both, rating of 3 means moderate reduction, and >=4 means high reduction. A rating of 0 for risks means that the task is not safety-critical, a risk rating <=2 means it can be easily detected and/or fixed by human experts, a rating of 3 means that the risk is moderate, and rating >=4 means the risk is high and cannot be easily detected. You can also provide an optional justification for your rating.

Example Evaluation

1. **Occupation**: Mathematicians
Task: Conduct research to extend mathematical knowledge in traditional areas, such as algebra, geometry, probability, and logic.

Reward Rating: 2
Risk Rating: 0
Reward Justification: LLMs can speed up subtasks like proof sketching, counterexample search, and literature review with the expert validating all claims. However, existing systems struggle in coming up with the right ideas and sketches for frontier math problems.
Risk Justification: The task is not safety critical, and therefore, there is no risk.

2. **Occupation**: Pharmacists
Task: Provide information and advice regarding drug interactions, side effects, dosage, and proper medication storage.

Reward Rating: 3
Risk Rating: 5
Reward Justification: Best rewards are on communication and workflow (not core clinical judgment): draft patient-friendly counseling, generate clarifying questions and draft messages to prescribers, while the pharmacist verifies key facts in trusted databases.
Risk Justification: The task is safety critical as incorrect interaction, dose, side-effect, or storage advice can cause serious harm. LLMs raise risks mainly via confident clinical errors or omissions, and automation bias. Most errors are catchable if a pharmacist verifies using authoritative drug databases or labeling and uses the patient profile, but subtle mistakes and outdated guidance can slip through, causing substantial harm.

3. **Occupation**: Human Resources Managers
Task: Identify staff vacancies and recruit, interview, and select applicants.

Reward Rating: 4
Risk Rating: 3
Reward Justification: high reward when used for operations, not decision-making: draft job ads or outreach, summarize resumes into structured fields (verified), generate interview guides or rubrics, schedule or communicate, and draft documentation.
Risk Justification: It's a critical task, and hiring errors can cause serious individual harm and create legal or reputational risk. LLMs raise risk via biased screening or interview framing, mishandling applicant PII,

incorrect compliance guidance, and misuse. Many issues are catchable with structured rubrics, audits, and keeping LLM output advisory, not decisive, but subtle bias or privacy failures can slip through.

4. **Occupation**: Claims Adjusters, Examiners, and Investigators
Task: Review police reports, medical treatment records, medical bills, or physical property damage to determine the extent of liability.

Reward Rating: 4
Risk Rating: 4
Reward Justification: High reward for evidence organization: extract entities, build timelines, flag inconsistencies, draft letters, and generate follow-up questions.
Risk Justification: The task is safety critical; wrong liability calls can seriously harm claimants or insurers and create legal or fraud exposure. LLMs raise risk by misreading or omitting evidence, hallucinating facts, making overconfident liability inferences, and introducing biased credibility judgments; sensitive medical or police data also heightens privacy or security risk, and fraudsters can tailor narratives to game the model. Humans can catch many issues if LLMs are limited to summarization or extraction and every claim is traced back to the record, but subtle distortions can slip through.

Comprehension check. Before continuing, please answer the following question to confirm your understanding of the task.

When assigning the Reward score, what should you compare?

- (●) The benefit of completing the task with assistance from an LLM compared with completing the same task without an LLM after accounting for verification costs
- ( ) The performance of one LLM compared with another LLM.
- ( ) The benefit of completing the task with assistance from an LLM compared with completing the same task without an LLM without considering verification costs
- ( ) The benefit of this task compared with other legal tasks.

Comprehension check. **When assigning the Risk score, what should you consider?**

- ( ) how frequently the LLM makes mistakes.
- ( ) the potential consequences of humans generating harmful output
- (●) the potential consequences of harmful errors that go undetected
- ( ) the amount of time saved by using the LLM

Q20. **Your previous response indicates that the rating criteria may not have been fully understood.**

For each task within different occupations, determine the risks and rewards of using an LLM system (e.g., LLMs, LLM-based agents) in collaboration with a human expert to complete the task. For determination, use your knowledge of the current capabilities of the best-performing LLM systems.

First, determine whether the task is safety-critical, i.e., any unintentional errors or exploitation of LLM capabilities by malicious actors can cause significant harm at the individual, organizational, or societal level. If yes, then quantify the extent to which using the combination of LLM Systems + Human Experts in performing the task increases the risk compared to only having human experts complete the task. Considering the cost of detecting and mitigating risks with experts, determine if the combination of LLM systems + Human Experts can significantly decrease the cost (in USD) or time of completing the task while keeping the same quality as expert humans. Key vulnerabilities of LLM systems to consider include: **Discrimination, Toxicity, Privacy, Security, Misinformation, and Malicious Actors and Misuse**.

For each evaluation: Rate both the reward and risk associated with LLM systems on a scale from 0 to 5. Here, for rewards, a rating of 0 means that using LLM systems cannot reduce overall task completion time or cost while keeping equivalent quality, rating <=2 means relatively low reduction in overall cost or time or both, rating of 3 means moderate reduction, and >=4 means high reduction. A rating of 0 for risks means that the task is not safety-critical, a risk rating <= 2 means it can be easily detected and/or fixed by human experts, a rating of 3 means that the risk is moderate, and rating >= 4 means the risk is high and cannot be easily detected. You can also provide an optional justification for your rating.

This question was not displayed to the respondent.

Q21. Let's review the instructions once more. Please answer the following questions to confirm your understanding of the task. **To continue with the survey, you must answer both questions correctly. Otherwise, the survey will end.**

For the Reward score, what should you compare?

This question was not displayed to the respondent.

Q22. **For the Risk score, what should you consider?**

This question was not displayed to the respondent.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Determine existence and amount of liability according to current laws, administrative and judicial precedents, and available evidence.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

LLMs can speed up evidence review, legal research, and draft analysis, but all conclusions require expert verification.

Risk justification. Optional justification of your risk rating

Incorrect liability decisions can cause serious legal and financial harm, and subtle LLM errors may not always be detected.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Conduct hearings to review and decide claims regarding issues, such as social program eligibility, environmental protection, or enforcement of health and safety regulations.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help prepare summaries and draft documents, but the hearing and decision-making remain largely human-led.

Risk justification. Optional justification of your risk rating

Mistakes can affect legal rights, eligibility, or regulatory outcomes, and undetected errors may cause serious harm.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Recommend the acceptance or rejection of claims or compromise settlements according to laws, regulations, policies, and precedent decisions.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly review claims, summarize evidence, compare relevant laws, and draft recommendations, providing significant time savings.

Risk justification. Optional justification of your risk rating

Incorrect recommendations or overlooked legal details can lead to unfair claim decisions or settlements, though expert review can catch many errors.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Authorize payment of valid claims and determine method of payment.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can assist with reviewing claim information and drafting payment documentation, providing moderate time savings, but final authorization and payment decisions require expert verification.

Risk justification. Optional justification of your risk rating

Incorrect payment authorization or payment method can cause financial loss or legal issues, but most errors can be detected through expert review.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Rule on exceptions, motions, or admissibility of evidence.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

LLMs can summarize evidence, research relevant rules, and draft rulings, providing moderate time savings.

Risk justification. Optional justification of your risk rating

Incorrect rulings on evidence or motions can affect case outcomes, and subtle legal errors may not always be detected during review.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Recommend acceptance or rejection of compromise settlement offers.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly review settlement details, summarize evidence, and draft recommendations, saving significant time.

Risk justification. Optional justification of your risk rating

Poor recommendations may lead to unfair settlements or legal disputes, but expert review can detect most errors before decisions are made.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Apply relevant laws, regulations, policies, or precedents to reach conclusions.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can assist with legal research and summarizing relevant laws and precedents, providing moderate time savings.

Risk justification. Optional justification of your risk rating

Applying the wrong law or precedent can lead to incorrect legal conclusions, and subtle errors may be difficult to detect even with expert review.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Conduct hearings to obtain information or evidence relative to disposition of claims.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2

- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help prepare hearing materials, summarize evidence, and draft notes, but the hearing itself requires human expertise.

Risk justification. Optional justification of your risk rating

Errors in handling evidence or hearing records can affect claim outcomes, though most issues can be identified through expert oversight.

Q7. **Occupation:**
Judges, Magistrate Judges, and Magistrates

Task:
Monitor proceedings to ensure that all applicable rules and procedures are followed.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

Justification: Real-time courtroom monitoring is an in-person, judgment-based task; an LLM offers little time/cost savings since the judge must actively perform this regardless.

Risk justification. Optional justification of your risk rating

Justification: Errors in real-time procedural oversight can directly violate due process rights and affect trial validity, with little opportunity for expert review before harm occurs.

Q7. **Occupation:**
Judges, Magistrate Judges, and Magistrates

Task:
Participate in judicial tribunals to help resolve disputes.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Directly participating in and deciding disputes requires human judgment, authority, and accountability; an LLM cannot perform this role, so time/cost savings are minimal.

Risk justification. Optional justification of your risk rating

Misapplied reasoning or bias in dispute resolution could produce unjust rulings with serious legal consequences, and such errors may be hard to catch before a decision is finalized.

Q7. **Occupation:**
Judges, Magistrate Judges, and Magistrates

Task:
Instruct juries on applicable laws, direct juries to deduce the facts from the evidence presented, and hear their verdicts.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

An LLM could help draft standard jury instructions for review, offering modest time savings, but delivering instructions and hearing verdicts are live, human-only functions.

Risk justification. Optional justification of your risk rating

Incorrect or poorly worded jury instructions can bias deliberations or create grounds for appeal, and such errors aren't always caught before the jury acts on them.

Q7. **Occupation:**
Judges, Magistrate Judges, and Magistrates

Task:
Award compensation for damages to litigants in civil cases in relation to findings by juries or by the court.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help calculate damages, research comparable awards, and draft supporting rationale, offering moderate time savings.

Risk justification. Optional justification of your risk rating

Miscalculated or poorly justified damage awards can cause financial harm or appeals, though expert review can catch most errors before final judgment.

Q7. **Occupation:**
Judges, Magistrate Judges, and Magistrates

Task:
Rule on custody and access disputes, and enforce court orders regarding custody and support of children.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

LLMs can help organize case files and summarize prior orders or relevant guidelines, offering modest time savings, but custody rulings require nuanced human judgment about a child's welfare.

Risk justification. Optional justification of your risk rating

Errors or bias in custody-related recommendations could directly harm children and families, and such sensitive, context-dependent decisions are hard to fully safeguard through review alone.

Q7. **Occupation:**
Judicial Law Clerks

Task:
Participate in conferences or discussions between trial attorneys and judges.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1

- ○ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Participating in live conferences between attorneys and judges is an in-person, interpersonal function; an LLM offers little time or cost savings for the task itself.

Risk justification. Optional justification of your risk rating

Since a law clerk mainly observes and assists rather than rules, LLM involvement carries lower direct risk, though misunderstanding case nuances could still affect later drafting or advice.

Q7. **Occupation:**
Judicial Law Clerks

Task:
Confer with judges concerning legal questions, construction of documents, or granting of orders.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help research legal questions and draft language for documents or orders ahead of the conference, offering moderate time savings in preparation.

Risk justification. Optional justification of your risk rating

Flawed legal research or misinterpreted precedent could mislead the judge's decision-making, and subtle errors may not always be caught before an order is issued.

Q7. **Occupation:**
Lawyers

Task:
Represent clients in court or before government agencies.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2

- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

Actually representing a client in court or before an agency is a live, in-person advocacy function requiring human presence and real-time judgment, so direct time/cost savings are minimal.

Risk justification. Optional justification of your risk rating

Any LLM-related error in live advocacy could directly harm a client's legal interests or case outcome, with little opportunity to catch mistakes before they affect the proceeding.

Q7. **Occupation:**
Lawyers

Task:
Act as agent, trustee, guardian, or executor for businesses or individuals.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help track deadlines, summarize account or estate documents, and draft routine correspondence, offering modest time savings in these fiduciary roles.

Risk justification. Optional justification of your risk rating

Acting as agent, trustee, guardian, or executor carries fiduciary and legal duties, so errors in financial or decision-making support could cause real harm to beneficiaries, though expert oversight can catch many issues.

Q7. **Occupation:**
Lawyers

Task:
Present evidence to defend clients or prosecute defendants in criminal or civil litigation.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

LLMs can help organize evidence and draft arguments, but presenting evidence in court relies primarily on the lawyer's expertise.

Risk justification. Optional justification of your risk rating

Errors or misleading arguments can affect case outcomes and legal rights, and some mistakes may not be detected before causing serious harm.

Q7. **Occupation:**
Lawyers

Task:
Help develop federal and state programs, draft and interpret laws and legislation, and establish enforcement procedures.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

LLMs can speed up legal research, compare statutes, and draft legislative language, providing significant time savings.

Risk justification. Optional justification of your risk rating

Errors in drafting or interpreting laws can have widespread legal and societal consequences, and subtle mistakes may be difficult to detect.

Q7. **Occupation:**
Paralegals and Legal Assistants

Task:
Meet with clients and other professionals to discuss details of cases.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help prepare meeting agendas, summarize case details, and draft notes, providing limited time savings.

Risk justification. Optional justification of your risk rating

The main risks involve privacy or inaccurate summaries, but professionals can usually detect and correct these issues during the meeting.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Issue subpoenas and administer oaths in preparation for formal hearings.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can draft subpoenas, prepare forms, and check required information, providing moderate time savings.

Risk justification. Optional justification of your risk rating

Errors in legal documents or procedures can delay hearings or create legal issues, but experts can usually identify and correct them before issuance.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Conduct studies of appeals procedures in field agencies to ensure adherence to legal requirements and to facilitate determination of cases.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0

- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly analyze procedures, summarize regulations, and identify potential compliance issues, saving significant time.

Risk justification. Optional justification of your risk rating

Incorrect analysis may overlook legal compliance issues, but findings are generally reviewed by experts before implementation.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Determine extent of liability according to evidence, laws, or administrative or judicial precedents.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can draft well-structured opinions, summarize evidence, and organize legal reasoning, saving significant time.

Risk justification. Optional justification of your risk rating

Errors in legal reasoning or factual findings can affect case outcomes, though expert review can identify most issues before issuance.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Issue subpoenas or administer oaths to prepare for formal hearings.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0

- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can draft subpoenas, prepare forms, and verify required information, providing moderate time savings.

Risk justification. Optional justification of your risk rating

Errors in legal documents or hearing procedures can cause delays or procedural issues, but experts can usually detect and correct them.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Prepare settlement agreements for disputants to sign.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly draft settlement agreements, organize terms, and improve document consistency, saving significant time.

Risk justification. Optional justification of your risk rating

Errors or ambiguous language can create legal disputes or unfair agreements, though expert review can catch most issues before signing.

Q7. **Occupation:**
Judges, Magistrate Judges, and Magistrates

Task:
Supervise other judges, court officers, and the court's administrative staff.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0

- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help prepare schedules and courtroom documents, but the courtroom duties themselves require in-person human performance.

Risk justification. Optional justification of your risk rating

Errors may disrupt court procedures, but they are usually immediately visible and can be corrected by court staff.

Q7. **Occupation:**
Judicial Law Clerks

Task:
Attend court sessions to hear oral arguments or record necessary case information.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can rapidly search, summarize, and compare legal authorities, providing major time savings.

Risk justification. Optional justification of your risk rating

LLMs may misinterpret or hallucinate legal authorities, and relying on incorrect research could affect court decisions if not carefully verified.

Q7. **Occupation:**
Lawyers

Task:
Examine legal data to determine advisability of defending or prosecuting lawsuit.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2

- ○ 1

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly analyze legal documents, summarize evidence, and identify relevant precedents, saving significant time.

Risk justification. Optional justification of your risk rating

Incorrect legal analysis or overlooked facts may lead to poor litigation decisions, though expert review can detect many errors.

Q7. **Occupation:**
Lawyers

Task:
Evaluate findings and develop strategies and arguments in preparation for presentation of cases.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can summarize evidence, identify relevant precedents, and draft legal arguments, providing significant time savings.

Risk justification. Optional justification of your risk rating

Weak or inaccurate legal strategies can affect case outcomes, though experienced lawyers can identify and correct most errors before presentation.

Q7. **Occupation:**
Lawyers

Task:
Negotiate contractual agreements.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3

- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can draft contract language, compare clauses, and identify negotiation issues, saving significant time.

Risk justification. Optional justification of your risk rating

Incorrect legal advice or overlooked contract terms can lead to costly disputes, though lawyers can identify most errors through careful review.

Q7. **Occupation:**
Lawyers

Task:
Study Constitution, statutes, decisions, regulations, and ordinances of quasi-judicial bodies to determine ramifications for cases.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3

- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can rapidly research, summarize, and compare legal authorities, providing major time savings.

Risk justification. Optional justification of your risk rating

LLMs may misinterpret or omit important legal authorities, leading to flawed case analysis if not carefully verified by a lawyer.

Q7. **Occupation:**
Paralegals and Legal Assistants

Task:
Arbitrate disputes between parties and assist in the real estate closing process, such as by reviewing title searches.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly review title searches, organize documents, and draft closing paperwork, saving significant time.

Risk justification. Optional justification of your risk rating

Missing title defects or incorrect legal analysis can lead to costly property disputes, though expert review can identify many errors.

Q7. **Occupation:**
Paralegals and Legal Assistants

Task:
Appraise and inventory real and personal property for estate planning.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can organize asset information, draft inventories, and prepare estate planning documents, providing moderate time savings.

Risk justification. Optional justification of your risk rating

Incorrect asset information or omissions can affect estate planning, but experts can usually identify and correct these errors before finalization.

Q7. **Occupation:**
Title Examiners, Abstractors, and Searchers

Task:
Prepare and issue title commitments and title insurance policies, based on information compiled from title searches.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0

- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can summarize title search results, draft title commitments, and prepare policy documents, saving significant time.

Risk justification. Optional justification of your risk rating

Missing title defects or inaccurate policy details can cause serious legal and financial consequences, though expert review can catch many errors.

Q7. **Occupation:**
Title Examiners, Abstractors, and Searchers

Task:
Verify accuracy and completeness of land-related documents accepted for registration, preparing rejection notices when documents are not acceptable.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly check document completeness, identify missing information, and draft rejection notices, saving significant time.

Risk justification. Optional justification of your risk rating

Incorrect verification may allow invalid registrations or reject valid documents, causing legal or financial consequences despite expert review.

Q7. **Occupation:**
Title Examiners, Abstractors, and Searchers

Task:
Retrieve and examine real estate closing files for accuracy and to ensure that information included is recorded and executed according to regulations.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can review closing files, identify missing information, and check document consistency, saving significant time.

Risk justification. Optional justification of your risk rating

Missed errors or regulatory issues can lead to invalid property records or legal disputes, though expert review can identify many problems.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Explain to claimants how they can appeal rulings that go against them.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can quickly draft personalized appeal instructions and explain procedures in plain language, saving significant time.

Risk justification. Optional justification of your risk rating

Incorrect appeal guidance could affect a claimant's rights, but experts can usually review and correct the information before it is provided.

Q7. **Occupation:**
Administrative Law Judges, Adjudicators, and Hearing Officers

Task:
Schedule hearings.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can automate scheduling, coordinate calendars, and generate hearing notices, providing major time savings.

Risk justification. Optional justification of your risk rating

Scheduling errors may cause delays, but they are usually easy to detect and correct before the hearing.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Conduct studies of appeals procedures to ensure adherence to legal requirements or to facilitate disposition of cases.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can analyze appeal procedures, summarize regulations, and identify compliance issues, saving significant time.

Risk justification. Optional justification of your risk rating

Incorrect analysis may overlook procedural or legal issues, but experts can usually detect and correct them before use.

Q7. **Occupation:**
Arbitrators, Mediators, and Conciliators

Task:
Conduct initial meetings with disputants to outline the arbitration process, settle procedural matters, such as fees, or determine details, such as witness numbers or time requirements.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3

Reward Justification. Optional justification of your reward rating

LLMs can quickly summarize mortgages, deeds, and contracts, providing major time savings.

Risk justification. Optional justification of your risk rating

Incorrect summaries or omitted details may affect title decisions, but experts can usually verify the original documents and correct errors.

Q7. **Occupation:**
Title Examiners, Abstractors, and Searchers

Task:
Read search requests to ascertain types of title evidence required and to obtain descriptions of properties and names of involved parties.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

Reward Justification. Optional justification of your reward rating

LLMs can extract property details, identify involved parties, and classify title search requests, providing significant time savings.

Risk justification. Optional justification of your risk rating

Incorrect extraction or interpretation may lead to incomplete title searches, but experts can usually verify the information before proceeding.

Q7. **Occupation:**
Title Examiners, Abstractors, and Searchers

Task:
Direct activities of workers who search records and examine titles, assigning, scheduling, and evaluating work, and providing technical guidance as necessary.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

Reward Justification. Optional justification of your reward rating

LLMs can assist with task assignment, scheduling, workload summaries, and technical documentation, providing moderate time savings.

Risk justification. Optional justification of your risk rating

Errors mainly affect workflow or staff coordination and are generally easy for supervisors to detect and correct.

Q7. **Occupation:**
Title Examiners, Abstractors, and Searchers

Task:
Obtain maps or drawings delineating properties from company title plants, county surveyors, or assessors' offices.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 5

Reward Justification. Optional justification of your reward rating

LLMs can help identify required records, draft requests, and organize property information, providing limited time savings.

Risk justification. Optional justification of your risk rating

Errors may delay obtaining maps or drawings, but they are usually easy to detect and correct before use.

Q23. Thank you for participating in this study. Your responses have been successfully recorded. Your MTurk Completion Code UIUC-LEGAL-B74X-Q29N
