Instructions. **Project Title**: Economic Impact of LLM Systems on Computer Occupation Tasks

Invitation You are invited to participate in a research study conducted by researchers at the University of Illinois Urbana–Champaign. The purpose of this study is to construct an independent reference benchmark for evaluating AI-generated assessments of occupational tasks. Your participation is voluntary.

Who Can Participate? You should participate only if you have professional experience in computer occupation field (e.g., software engineers, web developers, cybersecurity experts, or another software profession).

Procedures You will review 90 occupational tasks drawn from computer occupations in the O*NET database.

For each task, you will: assign a Reward score between 0 and 5, assign a Risk score between 0 and 5, and optionally provide a brief explanation for your ratings.

For both assessments, assume that a qualified professional completes the task using assistance from the most capable large language model (LLM) or LLM-based agent currently.

Reward measures the potential net productivity benefit (such as time or cost savings), relative to completing the task without LLM assistance, while accounting for the effort required to verify and correct the model's outputs.

Risk measures the likelihood and potential severity of harms that could arise from using the LLM for the task, including harms affecting individuals, organizations, or society.

Time Required Approximately 75-90 minutes.

Compensation You will receive compensation through Prolific upon successful completion of the study.

Risks The risks associated with participation are no greater than those ordinarily encountered when completing an online questionnaire.

Benefits You will not receive any direct benefit from participating. However, your responses will help researchers develop more reliable methods for evaluating AI systems used in workforce and economic analyses.

Privacy and Confidentiality No personally identifying information will be collected as part of the research dataset. Responses will be stored securely and analyzed only in aggregate. Information collected through Prolific will be used solely to verify study completion and process compensation.

Voluntary Participation Your participation is entirely voluntary. You may stop participating at any time before submitting your responses without penalty.

Contact Information
Gagandeep Singh
Assistant Professor
School of Computing and Data Science
University of Illinois Urbana–Champaign (UIUC)
Email: ggnds@illinois.edu

Consent. I have read the information above and voluntarily agree to participate in this research study.

- (●) Yes
- ( ) No

Eligibility. Do you have professional education, training, or work experience in the computing field that would allow you to evaluate computer occupation tasks?

- (●) Yes
- ( ) No

Experience. How many years of professional experience do you have in computing?

- ( ) <1 year
- ( ) 1-2 years
- ( ) 3-5 years
- ( ) 6-10 years
- (●) >10 years

Instructions. For each task within different occupations, determine the risks and rewards of using an LLM system (e.g., LLMs, LLM-based agents) in collaboration with a human expert to complete the task. For determination, use your knowledge of the current capabilities of the best-performing LLM systems.

First, determine whether the task is safety-critical, i.e., any unintentional errors or exploitation of LLM capabilities by malicious actors can cause significant harm at the individual, organizational, or societal level. If yes, then quantify the extent to which using the combination of LLM Systems + Human Experts in performing the task increases the risk compared to only having human experts complete the task. Considering the cost of detecting and mitigating risks with experts, determine if the combination of LLM systems + Human Experts can significantly decrease the cost (in USD) or time of completing the task while keeping the same quality as expert humans.

Key vulnerabilities of LLM systems to consider include:

1. **Discrimination**. Unequal treatment of individuals or groups by LLM systems, often based on race, gender, or other sensitive characteristics, resulting in unfair outcomes and representation of those groups. Further, the accuracy and effectiveness of LLM decisions and actions are dependent on group membership, where decisions in LLM system design and biased training data lead to unequal outcomes, reduced benefits, increased effort, and alienation of users.

2. **Toxicity.** LLMs can expose users to harmful, abusive, unsafe, or inappropriate content. May involve providing advice or encouraging action. Examples of toxic content include hate speech, violence, extremism, illegal acts, or child sexual abuse material, as well as content that violates community norms such as profanity, inflammatory, political speech, or pornography.

3. **Privacy**. LLM systems memorize and leak sensitive personal data or infer private information about individuals without their consent. Unexpected or unauthorized sharing of data and information can compromise user expectations of privacy, assist identity theft, or cause loss of confidential intellectual property.

4. **Security**. Vulnerabilities can be exploited in LLM systems, software development toolchains, and hardware, resulting in unauthorized access, data and privacy breaches, or system manipulation causing unsafe outputs or behavior.

5. **Misinformation**. LLM systems can inadvertently generate or spread incorrect or deceptive information, which can lead to inaccurate beliefs in users and undermine their autonomy. Humans who make decisions based on false beliefs can experience physical, emotional, or material harm. Highly personalized LLM-generated misinformation creates “filter bubbles” where individuals only see what matches their existing beliefs, undermining shared reality and weakening social cohesion and political processes.

6. **Malicious Actors and Misuse**. LLM systems can be used to conduct large-scale disinformation campaigns, malicious surveillance, or targeted and sophisticated automated censorship and propaganda, to manipulate political processes, public opinion, and behavior. LLM systems can be used to develop cyber weapons (e.g., by coding cheaper, more effective malware), develop new or enhance existing weapons (e.g., Lethal Autonomous Weapons or chemical, biological, radiological, nuclear, and high-yield explosives), or use weapons to cause mass harm. LLM systems can be used to gain a personal advantage over others through cheating, fraud, scams, blackmail, or targeted manipulation of beliefs or behavior. Examples include LLM-facilitated plagiarism for research or education, impersonating a trusted or fake individual for illegitimate financial benefit, or creating humiliating or sexual imagery.

For each evaluation: Rate both the reward and risk associated with LLM systems on a scale from 0 to 5. Here, for rewards, a rating of 0 means that using LLM systems cannot reduce overall task completion time or cost while keeping equivalent quality, rating <=2 means relatively low reduction in overall cost or time or both, rating of 3 means moderate reduction, and >=4 means high reduction. A rating of 0 for risks means that the task is not safety-critical, a risk rating <=2 means it can be easily detected and/or fixed by human experts, a rating of 3 means that the risk is moderate, and rating >=4 means the risk is high and cannot be easily detected. You can also provide an optional justification for your rating.

Example Evaluation

1. **Occupation**: Mathematicians
Task: Conduct research to extend mathematical knowledge in traditional areas, such as algebra, geometry, probability, and logic.

Reward Rating: 2
Risk Rating: 0
Reward Justification: LLMs can speed up subtasks like proof sketching, counterexample search, and literature review with the expert validating all claims. However, existing systems struggle in coming up with the right ideas and sketches for frontier math problems.
Risk Justification: The task is not safety critical, and therefore, there is no risk.

2. **Occupation**: Pharmacists
Task: Provide information and advice regarding drug interactions, side effects, dosage, and proper medication storage.

Reward Rating: 3
Risk Rating: 5
Reward Justification: Best rewards are on communication and workflow (not core clinical judgment): draft patient-friendly counseling, generate clarifying questions and draft messages to prescribers, while the pharmacist verifies key facts in trusted databases.
Risk Justification: The task is safety critical as incorrect interaction, dose, side-effect, or storage advice can cause serious harm. LLMs raise risks mainly via confident clinical errors or omissions, and automation bias. Most errors are catchable if a pharmacist verifies using authoritative drug databases or labeling and uses the patient profile, but subtle mistakes and outdated guidance can slip through, causing substantial harm.

3. **Occupation**: Human Resources Managers
Task: Identify staff vacancies and recruit, interview, and select applicants.

Reward Rating: 4
Risk Rating: 3
Reward Justification: high reward when used for operations, not decision-making: draft job ads or outreach, summarize resumes into structured fields (verified), generate interview guides or rubrics, schedule or communicate, and draft documentation.
Risk Justification: It's a critical task, and hiring errors can cause serious individual harm and create legal or reputational risk. LLMs raise risk via biased screening or interview framing, mishandling applicant PII,

incorrect compliance guidance, and misuse. Many issues are catchable with structured rubrics, audits, and keeping LLM output advisory, not decisive, but subtle bias or privacy failures can slip through.

4. **Occupation**: Claims Adjusters, Examiners, and Investigators
Task: Review police reports, medical treatment records, medical bills, or physical property damage to determine the extent of liability.

Reward Rating: 4
Risk Rating: 4
Reward Justification: High reward for evidence organization: extract entities, build timelines, flag inconsistencies, draft letters, and generate follow-up questions.
Risk Justification: The task is safety critical; wrong liability calls can seriously harm claimants or insurers and create legal or fraud exposure. LLMs raise risk by misreading or omitting evidence, hallucinating facts, making overconfident liability inferences, and introducing biased credibility judgments; sensitive medical or police data also heightens privacy or security risk, and fraudsters can tailor narratives to game the model. Humans can catch many issues if LLMs are limited to summarization or extraction and every claim is traced back to the record, but subtle distortions can slip through.

Comprehension check. Before continuing, please answer the following question to confirm your understanding of the task.

When assigning the Reward score, what should you compare?

- (●) The benefit of completing the task with assistance from an LLM compared with completing the same task without an LLM after accounting for verification costs
- ( ) The performance of one LLM compared with another LLM.
- ( ) The benefit of completing the task with assistance from an LLM compared with completing the same task without an LLM without considering verification costs
- ( ) The benefit of this task compared with other computing tasks.

Comprehension check. **When assigning the Risk score, what should you consider?**

- ( ) how frequently the LLM makes mistakes.
- ( ) the potential consequences of humans generating harmful output
- (●) the potential consequences of harmful errors that go undetected
- ( ) the amount of time saved by using the LLM

Q20. **Your previous response indicates that the rating criteria may not have been fully understood.**

For each task within different occupations, determine the risks and rewards of using an LLM system (e.g., LLMs, LLM-based agents) in collaboration with a human expert to complete the task. For determination, use your knowledge of the current capabilities of the best-performing LLM systems.

First, determine whether the task is safety-critical, i.e., any unintentional errors or exploitation of LLM capabilities by malicious actors can cause significant harm at the individual, organizational, or societal level. If yes, then quantify the extent to which using the combination of LLM Systems + Human Experts in performing the task increases the risk compared to only having human experts complete the task. Considering the cost of detecting and mitigating risks with experts, determine if the combination of LLM systems + Human Experts can significantly decrease the cost (in USD) or time of completing the task while keeping the same quality as expert humans. Key vulnerabilities of LLM systems to consider include: **Discrimination, Toxicity, Privacy, Security, Misinformation, and Malicious Actors and Misuse**.

For each evaluation: Rate both the reward and risk associated with LLM systems on a scale from 0 to 5. Here, for rewards, a rating of 0 means that using LLM systems cannot reduce overall task completion time or cost while keeping equivalent quality, rating <=2 means relatively low reduction in overall cost or time or both, rating of 3 means moderate reduction, and >=4 means high reduction. A rating of 0 for risks means that the task is not safety-critical, a risk rating <= 2 means it can be easily detected and/or fixed by human experts, a rating of 3 means that the risk is moderate, and rating >= 4 means the risk is high and cannot be easily detected. You can also provide an optional justification for your rating.

This question was not displayed to the respondent.

Q21. Let's review the instructions once more. Please answer the following questions to confirm your understanding of the task. **To continue with the survey, you must answer both questions correctly. Otherwise, the survey will end.**

For the Reward score, what should you compare?

This question was not displayed to the respondent.

Q22. **For the Risk score, what should you consider?**

This question was not displayed to the respondent.

Q7. **Occupation:**
Video Game Designers

Task:
Prepare and revise initial game sketches using two- and three-dimensional graphical design software.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

I thgink that using Ai for this is very helpful, you can facilitate the tweaking process and the results are rendered VERY quickly

Risk justification. Optional justification of your risk rating

It is initial design phase, at this stage ideas and story boards go through a human review. even if it makes a mistake there is no harm unless it is copyright related

Q7. **Occupation:**
Video Game Designers

Task:
Keep abreast of game design technology and techniques, industry trends, or audience interests, reactions, and needs by reviewing current literature, talking with colleagues, participating in educational programs, attending meetings or workshops, or participating in professional organizations or conferences.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

AI can gather and process more informaiton more quickly than humans can... I still feel that humans need to vet anything that it creates

Risk justification. Optional justification of your risk rating

Keeping in mind humnas will double check the work and it is a support process I dont think there is much at risk here sans lazy human oversight

Q7. **Occupation:**
Document Management Specialists

Task:
Keep abreast of developments in document management technologies and techniques by reviewing current literature, talking with colleagues, participating in educational programs, attending meetings or workshops, or participating in professional organizations or conferences.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

I think there is reward but not as high as the others - AI can gather and process more information than a team of humans

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer User Support Specialists

Task:
Read trade magazines and technical manuals, or attend conferences and seminars to maintain knowledge of hardware and software.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

We sort of do that now - is a tech runs into an issue they turn to AI anyway

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Web and Digital Interface Designers

Task:
Maintain understanding of current Web technologies or programming practices through continuing education, reading, or participation in professional conferences, workshops, or groups.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3

Q7. **Occupation:**
Information Technology Project Managers

Task:
Schedule and facilitate meetings related to information technology projects.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ◉ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4

- ○ 5

Reward Justification. Optional justification of your reward rating

It is just looking at schedules and getting the most opportune time to meet

Risk justification. Optional justification of your risk rating

I do nto see any real risk

Q7. **Occupation:**
Web Developers

Task:
Document test plans, testing procedures, or test results.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer User Support Specialists

Task:
Maintain records of daily data communication transactions, problems and remedial actions taken, or installation activities.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Web Administrators

Task:
Develop and implement marketing plans for home pages, including print advertising or advertisement rotation.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Document Management Specialists

Task:
Develop, document, or maintain standards, best practices, or system usage procedures.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Blockchain Engineers

Task:
Implement catastrophic failure handlers to identify security breaches and prevent serious damage.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in

collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

The risk is high unless they cannot act on things and have to defer to human

Q7. **Occupation:**
Blockchain Engineers

Task:
Design and verify cryptographic protocols to protect private information.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3

- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Information Security Analysts

Task:
Modify computer security files to incorporate new software, correct errors, or change individual access status.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Any number if thigns can go wrong unless a human oversees and deploys each change via a strict change control process

Q7. **Occupation:**
Information Security Analysts

Task:
Encrypt data transmissions and erect firewalls to conceal confidential information as it is being transmitted and to keep out tainted digital transfers.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4

- (●) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Digital Forensics Analysts

Task:
Write reports, sign affidavits, or give depositions for legal proceedings.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- ( ) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ( ) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- (●) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

NO LLM system should own a process cradle to grave

Q7. **Occupation:**
Digital Forensics Analysts

Task:
Preserve and maintain digital forensic evidence for analysis.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

It could make mistakes but what it is doing is pretty basic

Q7. **Occupation:**
Telecommunications Engineering Specialists

Task:
Implement controls to provide security for operating systems, software, and data.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

It is only implementing

Q7. **Occupation:**
Database Administrators

Task:
Plan, coordinate, and implement security measures to safeguard information in computer files against accidental or unauthorized damage, modification or disclosure.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

NO LLM should own it cradle to grave, the reward is high but not worth it

Q7. **Occupation:**
Digital Forensics Analysts

Task:
Recover data or decrypt seized data.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in

collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ◉ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Web Administrators

Task:
Implement Web site security measures, such as firewalls or message encryption.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3

- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Digital Forensics Analysts

Task:
Create system images or capture network settings from information technology environments to preserve as evidence.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Information Security Engineers

Task:
Develop or install software, such as firewalls and data encryption programs, to protect sensitive information.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer Network Support Specialists

Task:
Configure security settings or access permissions for groups or individuals.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Information Security Engineers

Task:
Identify security system weaknesses, using penetration tests.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Health Informatics Specialists

Task:
Develop or implement policies or practices to ensure the privacy, confidentiality, or security of patient information.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

A human would still have to publish it

Q7. **Occupation:**
Web Developers

Task:
Design and implement Web site security measures, such as firewalls and message encryption.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Telecommunications Engineering Specialists

Task:
Manage user access to systems and equipment through account management and password administration.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- (●) 2
- ( ) 3
- ( ) 4
- ( ) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ( ) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- (●) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

I would never automate that process

Q7. **Occupation:**
Information Security Engineers

Task:
Identify or implement solutions to information security problems.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ( ) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- (●) 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ( ) 0
- ( ) 1
- (●) 2
- ( ) 3
- ( ) 4
- ( ) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer and Information Research Scientists

Task:
Maintain network hardware and software, direct network security measures, and monitor networks to ensure availability to system users.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Information Security Analysts

Task:
Monitor use of data files and regulate access to safeguard information in computer files.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

The monitor part is safe but regulaiton woul dbe a hairball

Q7. **Occupation:**
Document Management Specialists

Task:
Administer document and system access rights and revision control to ensure security of system and integrity of master documents.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer Network Support Specialists

Task:
Install network software, including security or firewall software.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Aa long as humans perform the final setup and configuraiton we'd be ok

Q7. **Occupation:**
Penetration Testers

Task:
Identify security system weaknesses, using penetration tests.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Penetration Testers

Task:
Configure information systems to incorporate principles of least functionality and least access.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

LLM's can;t help with physical things

Q7. **Occupation:**
Web Administrators

Task:
Implement updates, upgrades, and patches in a timely manner to limit loss of service.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

It is at times a tedious task, updates etc are already able to be applied automatically anyway

Risk justification. Optional justification of your risk rating

If theere is an introduced bug a fast AI enabled system could deploy to more systems than if done manully

Q7. **Occupation:**
Network and Computer Systems Administrators

Task:
Perform routine network startup and shutdown procedures, and maintain control records.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Telecommunications Engineering Specialists

Task:
Implement or perform preventive maintenance, backup, or recovery procedures.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

These are mostly autonated already anyway

Q7. **Occupation:**
Network and Computer Systems Administrators

Task:
Implement and provide technical support for voice services and equipment, such as private branch exchange, voice mail system, and telecom system.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

AI agents deployed already do some of this

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Digital Forensics Analysts

Task:
Develop policies or requirements for data collection, processing, or reporting.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Network and Computer Systems Administrators

Task:
Design, configure, and test computer hardware, networking software and operating system software.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Health Informatics Specialists

Task:
Provide consultation to nurses regarding hardware or software configuration.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ◉ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ◉ 0
- ○ 1
- ○ 2

- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

I have worked in healthcare IT and I've never had to explain hardware and software to a nurse before, not in the contacts that I read above

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Web Developers

Task:
Monitor security system performance logs to identify problems and notify security specialists when problems occur.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Information Security Analysts

Task:
Monitor current reports of computer viruses to determine when to update virus protection systems.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer and Information Research Scientists

Task:
Participate in staffing decisions and direct training of subordinates.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- (●) 0
- ( ) 1
- ( ) 2
- ( ) 3

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ( ) 0
- ( ) 1
- ( ) 2
- ( ) 3
- ( ) 4
- (●) 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Web Administrators

Task:
Install or configure Web server software or hardware to ensure that directory structure is well-defined, logical, and secure, and that files are named properly.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

We already to pull a large scale software is using automated scripts, so I don't think this is much of a change

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer Systems Engineers/Architects

Task:
Develop efficient and effective system controllers.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Since I work as a systems architect and I use AI already as a tool I don't see much of a risk because I'm the expert in the situation and I vet everything that it gives me

Q7. **Occupation:**
Computer Systems Engineers/Architects

Task:
Direct the analysis, development, and operation of complete computer systems.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1

- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Web Administrators

Task:
Test issues such as system integration, performance, and system security on a regular schedule or after any major program modifications.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Health Informatics Specialists

Task:
Analyze and interpret patient, nursing, or information systems data to improve nursing services.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2

- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Document Management Specialists

Task:
Prepare and record changes to official documents and confirm changes with legal and compliance management staff, including enterprise-wide records management staff.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Database Administrators

Task:
Plan and install upgrades of database management system software to enhance database performance.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ◉ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Computer Network Architects

Task:
Supervise engineers or other staff in the design or implementation of network solutions.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ◉ 3
- ○ 4
- ○ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Digital Forensics Analysts

Task:
Write technical summaries to report findings.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ○ 2
- ○ 3
- ○ 4
- ◉ 5

Risks. Provide a **risk** rating of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ◉ 1
- ○ 2
- ○ 3
- ○ 4
- ○ 5

Reward Justification. Optional justification of your reward rating

I use them for this now and don't see any real risk unless you drop the ball and don't do any editing

Risk justification. Optional justification of your risk rating

Q7. **Occupation:**
Telecommunications Engineering Specialists

Task:
Review and evaluate requests from engineers, managers, and technicians for system modifications.

Rewards. Provide a **reward** rating (time or monetary savings) of using LLM Systems for this task in collaboration with a human expert

- ○ 0
- ○ 1
- ◉ 2
- ○ 3
